NOTES

I. Yem

1. General.

Yemsa, or Janjero, is currently spoken by approximately 100,000 people in the Oromia Region of Ethiopia. Judging by the data in [Aklilu Yilma 2002], the dialectal variety of the language is quite large, but available data are too incomplete and unreliable to conduct a proper lexicostatistical survey between any of them. For our main source, we rely on the seemingly well-transcribed wordlist in [Wedekind 1990], following the author's own phonetic analysis; in the notes section, we consistently indicate the corresponding equivalents (and discrepancies, if there are any) in the survey data of [Aklilu Yilma 2002], comprising three distinct dialects: Yemsa proper (Central Highland area), Fofa, and Toba. For a couple of entries where the data were lacking, we have to

rely on [Lamberti 1993] as the only source.

2. *Transliteration.*

The transcription in [Hayward 1990] has been retained with a minimal share of transliteration. Long vowels (*ii*, *ee*, etc.) have been transliterated to UTS *i:*, *e:*, etc. The affricates *č*, *ž* are transcribed as *č*, *ž* respectively (they are noted as "palato-alveolar" in the source); palatal nasal *ň* is transcribed as UTS *n̄*.

II. Chara

1. *General.*

There are relatively few sources on Chara, spoken by approximately 13,00 people in the Debub Omo zone. The oldest source, a brief grammar sketch and wordlist in [Cerulli 1938], is heavily quoted in the notes section of the current wordlist, but the wordlist itself is drawn from [Aklilu Yilma 2002], the only modern source on the language that is useful for lexicostatistical purposes. It is important to note that the "Shara" language, described by Linda Jordan in her 2009 thesis, is not the same as "Chara" and seems to be more of a dialectal form of Melo; data on "Shara" should not be mixed together with data from the works of Cerulli and Aklilu Yilma (which, on the contrary, do seem to be describing more or less the same lect).

2. *Transliteration.*

Aklilu Yilma's transcription largely follows IPA regulations and only requires the usual cosmetic changes from IPA to UTS (*tʃ* > *č*; also, Aklilu's *j* corresponds to *ʒ*, not *y*, in the UTS, i. e. this is a violation of IPA rules on his part). Chara is described by Aklilu Yilma as a stress-governed rather than tonal language; he typically marks stress as *́V*, which we convert to *'V*.

III. Bench

1. General.

"Bench", or "Bench-non" (*non* = 'mouth, language'), is the name of a dialect (spoken by about 200,000 people) of the language formerly called "Gimira" that also includes the closely related She (She-non) and Mer (Mer-non) dialects. As our primary source of lexical data, we use the wordlist in [Wedekind 1990], where, in addition to Bench, some discrepancies between the three dialects are indicated (lexicostatistically, these seem to be minimal). A much more significant source for the further study of Bench is the more recent grammatical description and glossary in [Rapold 2006]; fortunately, in most cases its data fully coincide with the corresponding entries in Wedekind's wordlist, so in those few cases where the necessary entry is missing in [Wedekind 1990], we can fill in the empty slot with data from [Rapold 2006].

2. Transliteration.

On the transcription system used in [Hayward 1990], see notes on Yem above. The transcription in [Rapold 2006] is largely concurrent, except that the author relies a bit more on standard IPA, and the system of coronal affricates and sibilants is not only transcribed differently by the two authors, but is even interpreted differently: "denti-alveolar", "palatal", and "retroflex" consonants of Hayward correspond to "alveolar", "postalveolar", and "alveolo-palatal" consonants of Rapold, respectively. Cf. the discrepancies summarized in the table below, as well as the result of conversion to the UTS system (in the case of the third series, we respect the interpretations of both authors and convert Hayward's symbols to UTS retroflex consonants and Rapold's symbols to palatal consonants):

Hayward 1990	Rapold 2006	UTS
š	ts	c
š'	ts'	c'
z	z	z
s	s	s

Hayward 1990	Rapold 2006	UTS
č	tʃ	č
č'	tʃ'	č'
ž	ʒ	ž
š	ʃ	š
č	cɸ	ç (ç)
č'	cɸ'	ç' (ç')
ž	zɸ	z (z)
š	ɸ	ɸ (ɸ)

IV. Dorze

1. General.

The only easily available source on Dorze, currently spoken by about 30,000 people in the north Omo zone, is [Alemayeh 2002], a representative wordlist personally collected by the author, but without any additional information on phonology or grammar, let alone text examples; the few other known sources on the language are somewhat obscure Ethiopian PhD theses that still remain unavailable to us. Nevertheless, the wordlist is sufficiently large to fill in almost 100 positions on the 110-item wordlist and include Dorze in all standard lexicostatistical calculations.

2. Transliteration.

Alemayeh's data are largely consistent with standard IPA transcription; exceptions seem to have been made for affricates, where the author uses φ to denote a voiceless palatal affricate (just as in UTS), and ʒ to denote a voiced affricate (ž?).

1. ALL

Yem *zùtt-èrà* (1) / *kùp'-ìrà* (2), Chara *fitt-a* (3) / *'ureri* (4), Bench *kāng* (3), Dorze *wu:ri* (4).

References and notes:

Yem: Wedekind 1990: 140. Also *zùtt-āmbà:sē* id. Both forms seem to be derived from the verb *zù:tū* 'to assemble, unite'. The second is quoted as *züt:-āmbà:sē* in [Aklilu et al. 2002: 19]. Wedekind 1990: 140. Also *kùp'-āmbà:sē* id. Both forms seem to be derived from the verb *kùp'ō* 'to call together'. Quoted as *kup'-ira* (*kú-ā:mbà:sí* in the Fofa dialect) in [Aklilu et al. 2002: 19]. Semantic difference between *zùtt-* and *kùp'* is unclear; we have to include both forms as technical synonyms.

Chara: Aklilu Yilma 2002: 20. Differently in [Cerulli 1938: 177]: *wukko*: ~ *wuha*: 'all'. Aklilu Yilma 2002: 22. Not clear how this is different from *fitt-a*.

Bench: Wedekind 1990: 104; Rapold 2006: 614. Cf. *ke'p* 'all' in the She dialect [Wedekind 1990: 105].

Dorze: Alemayeh 2002: 13.

Yem: Wedekind 1990: 124; Aklilu et al. 2002: 19. For the Fofa dialect, the latter source indicates the variant *gōjā*; for the Toba dialect, the variant *gō:gó*, which may be a separate root, cf. *gō:gō* 'skin, hide' in [Wedekind 1990: 124].

Chara: Aklilu Yilma 2002: 14. Same word as 'skin' q.v. Aklilu Yilma 2002: 14. Difference between *g'ong-a* and *g'ur?-a* is not explained.

Bench: Wedekind 1990: 107. Quoted as *gòp'är* ~ *gòmp'är* in [Rapold 2006: 615].

31. FOOT

Yem *òč-ō* # (1) / *òrg-ō* (2), Chara *t'a:y-a* (3), Bench *tō?* (3), Dorze *toh-o* (3).

References and notes:

Yem: Wedekind 1990: 132. Polysemy: 'leg / foot'. Cf. also the "respectful" form: *tib-ō* 'leg, foot' [Wedekind 1990: 136]. Cf. also *zō:m-ā* 'leg (lower); foot' [Wedekind 1990: 140]. In [Aklilu et al. 2002: 21], *zōč-ó*: is given as the equivalent for 'foot' in the Fofa and Toba dialects; for Yemsa proper, the form *òrg-ō* is listed. On the whole, a rather confused situation; we prefer to list at least *òč-ō* and *òrg-ō* as technical synonyms. Wedekind 1990: 133. Polysemy: 'leg / foot'.

Chara: Aklilu Yilma 2002: 14. Quoted as *tay ~ to:y-a*: in [Cerulli 1938: 176].

References and notes:

Yem: Wedekind 1990: 131; Akhilu et al. 2002: 21. Meaning glossed as 'full, levelled'. Cf. also *tù:n-ū* 'to fill'; *tù:m-à* 'much filled'; *tù:m-ì* 'filled sufficiently' [Wedekind 1990: 137]. In [Akhilu et al. 2002: 21], *tō:mā:* is listed in the meaning 'full' for the Fofa dialect.

Chara: Akhilu Yilma 2002: 21.

Bench: Not attested in Wedekind's data. Cf., however, *çō-n* 'full' in [Rapold 2006: 617].

Dorze: Alemayeh 2002: 14.

33. GIVE

Yem *im-ā* (1), Chara *?in* (2), Bench *úc* (3), Dorze *imm-ires* (1).

References and notes:

Yem: Wedekind 1990: 126; Akhilu et al. 2002: 21. Cf. also the "respectful" equivalent *kúš-ō* [Wedekind 1990: 129]. In [Akhilu et al. 2002: 21], the verb *wolg-ū* is also listed as 'to give', but in [Wedekind 1990: 138] it is given in the meaning 'to give back, return'.

Chara: Akhilu Yilma 2002: 15. Quoted as *im-* in [Cerulli 1938: 161].

Bench: Wedekind 1990: 156; Rapold 2006: 619. Rapold analyzes the word as *út-s* and defines it as a causative formation from *ēt* 'to take'.

Dorze: Alemayeh 2002: 9.

34. GOOD

Yem *mā?ār* (1), Chara *'ons-a* (2), Bench *dīgám* (3), Dorze *lo?o* (4).

References and notes:

Yem: Wedekind 1990: 131; Akhilu et al. 2002: 21. Polysemy: 'good / kind'.

Chara: Akhilu Yilma 2002: 20.

Bench: Wedekind 1990: 100. Differently in [Rapold 2006: 617]: *sóy* 'good'.

References and notes:

Yem: Wedekind 1990: 120; Akhilu et al. 2002: 21. Completely different equivalent for the Fofa dialect: *?ārēŋwádē*: 'green'.

Chara: Akhilu Yilma 2002: 20. Differently in [Cerulli 1938: 176]: *tuluk-a*: 'green'.

Dorze: Alemayeh 2002: 12.

36. HAIR

Yem *sōm-ā* (1), **Chara** *k'us-na?* (2), **Bench** *nánč'* # (3), **Dorze** *isk-e* (4).

References and notes:

Yem: Wedekind 1990: 133; Akhilu et al. 2002: 21.

Chara: Akhilu Yilma 2002: 13. Quoted as *kus-na*: in [Cerulli 1938: 170].

Bench: Rapold 2006: 609. This word is not attested in [Wedekind 1990]; however, in Rapold's vocabulary it is explicitly listed as the default equivalent for the meaning 'hair on head'. At the same time, the word *küst*, glossed in [Wedekind 1990: 106] with polysemy: 'hair / fur', is glossed by Rapold as 'hair on the body except on head' (he does admit that *dēb küst* 'head hair' is also used by some speakers, but clearly as a secondary alternative). We tentatively list *nánč'* as the default equivalent for the required meaning 'hair of head'.

Yem: Wedekind 1990: 136; Akhilu et al. 2002: 21. Polysemy: 'head / top'.

Chara: Akhilu Yilma 2002: 13. Quoted as *to?y-a*: ~ *to?y* ~ *toy-a*: in [Cerulli 1938: 176].

Bench: Wedekind 1990: 100; Rapold 2006: 609. Polysemy: 'head / top / on top of, on'. Cf. also *tóh* 'top' in [Rapold 2006: 609].

Dorze: Alemayeh 2002: 7.

39. HEAR

Yem *ōd-ō* (1), **Chara** *hayt-n'a* (2), **Bench** *sīs-* ~ *sīs-k-* (3), **Dorze** *quy-res* (4).

References and notes:

Yem: Wedekind 1990: 132; Akhilu et al. 2002: 21. The "respectful" equivalent is *wè:s-ō* [Wedekind 1990: 138; Akhilu et al. 2002: 21].

Chara: Akhilu Yilma 2002: 13. Imperative form. Quoted as *hayd-* in [Cerulli 1938: 169].

Bench: Wedekind 1990: 158; Rapold 2006: 619.

Dorze: Alemayeh 2002: 7.

40. HEART

Yem *nīb-ā* (1), Chara *māy-a* (2), Bench *múzār* (3), Dorze *wozan-a* (4).

References and notes:

Yem: Wedekind 1990: 132; Aklilu et al. 2002: 21. In the latter source, quoted as *nīb-ā* for the Fofa dialect.

Chara: Aklilu Yilma 2002: 14. Same word as 'liver' q.v.

Bench: Wedekind 1990: 107; Rapold 2006: 609. The alternate synonym *máy* is glossed with polysemy: 'heart / liver / feelings' in [Wedekind 1990: 107] and as 'seat of emotions, liver' in [Rapold 2006: 609].

Dorze: Alemayeh 2002: 8.

41. HORN

Yem *kāl-ā* (1), Chara *'uš-a* (2), Bench *pēl* (3), Dorze *kaqe* (4).

References and notes:

Yem: Wedekind 1990: 127; Aklilu et al. 2002: 22.

Chara: Aklilu Yilma 2002: 17.

Bench: Wedekind 1990: 109. According to [Raold 2006: 609], *pēl* is applied to sheep, antelopes, cows, and "can be used as drinking cup"; the term is opposed to *úškñ* 'horn, of cows only; is not used for drinking cup'. We select *pēl* as the more generic term.

Dorze: Alemayeh 2002: 10.

Yem *tā* (1), Chara *t'a-ni* (1), Bench *tā* (1), Dorze *ta-ni* (1).

References and notes:

Chara: Aklilu Yilma 2002: 21. Quoted as *ta*: in [Cerulli 1938: 125].

Bench: Wedekind 1990: 160. Focus form; the non-focus variant is *tā*. Cf. also the absolute form: *tā-n* (same also in [Rapold 2006: 614]).

Dorze: Alemayeh 2002: 14.

43. KILL

Yem *kèž-ā* (1), Chara *w'ot'-* (2), Bench *wōt'* (2), Dorze *wor-ires* (3).

References and notes:

Yem: Wedekind 1990: 128. Cf. also *tèž-ā* id. [Wedekind 1990: 136]. Cf. also *wōr-ū* 'kill' [Wedekind 1990: 138]. All three of these terms are also encountered, without explication of semantic differences, in [Aklilu et al. 2002: 22]. Additionally, cf. *wó:r-i* 'kill' for the Toba dialect and yet another stem, *gōrūwā*: 'to kill', for the Fofa dialect.

Chara: Aklilu Yilma 2002: 17. Quoted as *wod* in [Cerulli 1938: 176].

Bench: Wedekind 1990: 113; Rapold 2006: 619. Cf. also the nominal stem *wōt'* 'death' [Wedekind 1990: 113].

Dorze: Alemayeh 2002: 10.

44. KNEE

Yem *kēl-ā* (1), Chara *k'um-a* (2), Bench *k'ūm* (2), Dorze *su:l-e* (3).

References and notes:

Yem: Wedekind 1990: 128; Akhilu et al. 2002: 22.

Chara: Akhilu Yilma 2002: 14.

Bench: Wedekind 1990: 107. Cf. *gür-āt* ~ *gūm-āt* 'knee' in [Rapold 2006: 609]: these two forms can hardly reflect the same root, and are also different from Wedekind's entry in that the initial consonant is voiced and there is an extra fossilized suffix, so the relation between all these attested forms is not entirely clear.

Dorze: Alemayeh 2002: 8.

45. KNOW

Yem *àrū* (1), Chara *'ar-* (1), Bench *ēr* (1).

References and notes:

Yem: Wedekind 1990: 117; Akhilu et al. 2002: 22.

Chara: Akhilu Yilma 2002: 22. Quoted as *ar-* in [Cerulli 1938: 162].

References and notes:

Yem: Wedekind 1990: 136; Akhilu et al. 2002: 22.

Chara: Akhilu Yilma 2002: 14.

Bench: Rapold 2006: 609. Same word as 'ear' q.v. (also attested as *ínc háy*, literally 'tree-ear'). Not attested in our main source, where we only find *kár* 'leaf of palm' and *kóč* 'leaf (blade) of grass' [Wedekind 1990: 162], neither of these the generic equivalent for 'tree-leaf'.

Dorze: Alemayeh 2002: 8. Same word as 'ear' q.v.

47. LIE

Yem *kūn-ā* # (1), Chara *g'etik-* (2), Bench *śāt-ń* # (3), Dorze *zinn?-ir* (4).

References and notes:

Yem: Wedekind 1990: 129. Meaning glossed as 'lie and sleep'. In [Akhilu et al. 2002: 22], *kūn-ā* is glossed simply as 'sleep' (although

as a sub-meaning to 'lie, he lies down'); the word *éšā* 'lie, he lies down' is dubious, since it is the same as *éš-a* 'lie (n.)' (i. e. 'untruth') in [Wedekind 1990: 122].

Chara: Aklilu Yilma 2002: 21.

Bench: Rapold 2006: 620. Meaning glossed as dynamic: 'to lie down', more accurately 'to lie down to sleep or rest a little', so the inclusion is somewhat dubious.

Dorze: Alemayeh 2002: 14.

48. LIVER

51. MAN

Yem *atk'ā-sù* (1), Chara *na:zi* # (2), Bench *āc* (3), Dorze *as-a* (3).

References and notes:

Yem: Wedekind 1990: 118; Aklilu et al. 2002: 22. Derived from *àtk'à* 'male'. In the latter source, listed simply as *?ās:ū* 'man' for the Fofa dialect.

Chara: Aklilu Yilma 2002: 9. Meaning glossed as 'male / man'; the morpheme also functions as a gender marker for animate nouns. Cf. an example on usage: *nazi a: ebamenne* "what did the man take?" [Aklilu Yilma 2002: 12].

Bench: Wedekind 1990: 97. Same word as 'person' q.v. Cf. also *?yán* 'man, male' [Wedekind 1990: 114]. Cf. in [Rapold 2006: 612]: *?yān* 'male' vs. *nás* 'a definite man (not used non-referentially)'.

References and notes:

- Yem:** Wedekind 1990: 116. Polysemy: 'mouth / language'. Complete homonymy with 'eye' (!). Quoted as *á:f-ā* in [Aklilu et al. 2002: 23]. Wedekind 1990: 132; Aklilu et al. 2002: 23. Difference between *á:f-ā* and *nò:n-ō* remains unclear.
- Chara:** Aklilu Yilma 2002: 13. Quoted as *no:n-a*; with polysemy: 'mouth / language' in [Cerulli 1938: 173]. The form *don-a*: 'mouth' in [Cerulli 1938: 166] is probably a dialectal variant (with dissimilation?). Cf. also the dialectal form *kunk-a*: 'mouth' [Cerulli 1938: 170].

Chara: Aklilu Yilma 2002: 19.

Bench: Wedekind 1990: 112. Differently in [Rapold 2006: 616]: *tūm* 'night'. In [Wedekind 1990: 112], this word is glossed with the meaning 'evening' (also verbal 'become evening, get late'); the situation needs additional investigation.

Chara: Aklilu Yilma 2002: 18. The precise quoted form is 'path' = 'foot road': *t'a:y-a b'uk-a*. However, on p. 22 'road' is glossed as *bok-a*. Quoted as *bok-a*: 'road' in [Cerulli 1938: 164].

Bench: Rapold 2006: 616. Meaning glossed as 'road, way'. Distinct from *pàr* 'broad, main road'; *dòm* 'main road'; *zătăr* 'path'. Of these terms, only *pàr* 'road, street' is attested in [Hayward 1990: 109].

References and notes:

Yem: Wedekind 1990: 123; Aklilu et al. 2002: 24. Wedekind glosses the meaning as 'sand at river bank', but Aklilu et al. has the simple meaning 'sand'.

Chara: Aklilu Yilma 2002: 19.

Bench: Wedekind 1990: 106. Meaning glossed as 'sand, sandy substance'. Quoted as *k'áč* 'sand' in [Rapold 2006: 616] (with elision of *-m-*?).

71. SAY

Yem *i* (1), Chara *d'iʔ-en* (2), Bench *màk* (3), Dorze *gay-ires* (4).

References and notes:

Yem: Wedekind 1990: 125. Glossed as *i* in [Aklilu et al. 2002: 24]. Also *ū* 'say' [Wedekind 1990: 137; Aklilu et al. 2002: 24]; this would rather seem to be an infinitive form, contracted from **i-u* (cf. 'eat', etc.), than a separate root. However, a different equivalent is listed for the Toba dialect: *sī:nī* 'say' in [Aklilu et al. 2002: 24].

Chara: Aklilu Yilma 2002: 16. Imperative form. Cf. *za*: 'to say' in [Cerulli 1938: 178].

Bench: Wedekind 1990: 107; Rapold 2006: 620. Polysemy: 'say / mean / think' (Wedekind); 'say / do / want' (Rapold). Distinct from *hāy'* 'to tell', *gāh* 'to speak' [Rapold 2006: 620].

References and notes:

Yem: Wedekind 1990: 119; Aklilu et al. 2002: 24. The latter source also adds *ičmà* 'see', not attested in Wedekind's wordlist; and *gíwe* as the equivalent for the Toba dialect.

Chara: Aklilu Yilma 2002: 13.

Bench: Wedekind 1990: 99; Rapold 2006: 620.

Dorze: Alemayeh 2002: 7.

Yem: Wedekind 1990: 139; Aklilu et al. 2002: 24. Polysemy: 'seed / tribe'.

Chara: Aklilu Yilma 2002: 14.

Bench: Wedekind 1990: 114; Rapold 2006: 616. According to Rapold, this word is 'seed for sowing' (further with polysemy: 'seed / clan'), while 'seed' in general is better rendered by *äp* 'eye / face / fruit / seed'.

Dorze: Alemayeh 2002: 8.

74. SIT

Yem *dūw-ū* (1), Chara *kalm-ne* (2) / *ut-na* (3), Bench *wòg* (3), Dorze *?utt-ires* (4).

References and notes:

Yem: Wedekind 1990: 121; Aklilu et al. 2002: 24. Wedekind glosses the meaning as 'sit and rest', but Aklilu et al. simply lists it as 'sit';

the form *dí* is also recorded. Cf. the "respectful" equivalent *mùč-ō* 'to sit down' [Wedekind 1990: 131; Akhilu et al. 2002: 24].

Chara: Akhilu Yilma 2002: 18. Akhilu Yilma 2002: 18. Distinction between *kalm-* and *ut-* is unclear.

Bench: Wedekind 1990: 112; Rapold 2006: 620. Cf. also *wòg-ās* "to seat, let sit" (caus.).

Chara: Akhilu Yilma 2002: 14.

Bench: Wedekind 1990: 99; Rapold 2006: 610. According to Rapold, distinct from *gōg* 'leather'.

76. SLEEP

Yem *àfāʔ-ō* (1), Chara *g'iʔ-* (2), Bench *gīs* # (2), Dorze *?eʒʒ-i* (3).

References and notes:

Yem: Wedekind 1990: 116; Akhilu et al. 2002: 24. Cf. also the "respectful" equivalent *giggitt-ō* [Wedekind 1990: 124]. Differently in Fofa (*kún-ēfēr*) and Toba (*kūn-i*) [Akhilu et al. 2002: 24]; these forms have the same root as 'to lie' q.v.

Chara: Akhilu Yilma 2002: 21.

Bench: Rapold 2006: 620. Different from the equivalent given in [Wedekind 1990: 110]: *sūr* ~ *sūr-k* 'to sleep'. This verb is, however, listed in [Rapold 2006: 620] as *sūr* 'to fall asleep', less eligible for inclusion in the Swadesh list; we trust [Rapold 2006] as a more modern and detailed source.

Dorze: Alemayeh 2002: 14.

Chara: Akhilu Yilma 2002: 20.

Bench: Wedekind 1990: 113. Cf. also *kōt*, with polysemy: 'small / few' [Wedekind 1990: 106]. In [Rapold 2006: 617], *yàrs* is glossed as 'little, young', and an alternate synonym, *kōþf*, is glossed as 'small'.

Dorze: Alemayeh 2002: 13.

Chara: Aklilu Yilma 2002: 20. Quoted as *aw-a*: in [Cerulli 1938: 163].

Bench: Wedekind 1990: 108. In [Rapold 2006: 616], the word is glossed in a more complex form: *ōbār-ín-āp*, where *ōbār-ín* = 'sunshine' (with a feminine marker) and *āp* = 'eye'.

Dorze: Alemayeh 2002: 12.

83. SWIM

References and notes:

Yem: Wedekind 1990: 116, 125. Cf. also *á:s ~ há:s* 'that (far away)' [ibid.]

Chara: Aklilu Yilma 2002: 21. In [Aklilu Yilma 1999: 47], the picture is more complicated: *sek-n* 'that (object to the side of the speaker)', pl. *sek-n-?endi* 'those'; *de-n* 'that (object in front of the speaker)', *yati-n* 'that (object behind the speaker)'. It seems that *sek-* is deemed the more basic term (it is the only one to be glossed in both sources, as well as the only term for which a special plural form is cited), so we tentatively include it as the only equivalent. Cf. *sek-ar-si* 'that' in [Cerulli 1938: 127].

Bench: Rapold 2006: 614. Rapold gives the paradigm: *ù-f*(masc.), *è-n* (fem.).

86. THIS

Yem *ān ~ hān* (1), Chara *h'a:-* (1), Bench *hà-ší* (1), Dorze *hay-ði* (1).

References and notes:

- Yem:** Wedekind 1990: 117, 125.
- Chara:** Akhilu Yilma 1999: 47. The complete paradigm is as follows: *ha-yisi* 'this (masc.)', *ha-na* 'this (fem.)', *ha-?endi* 'these'; cf. also *ha-ri* ~ *ha-ssi* 'here'. In [Akhilu Yilma 2002: 21], the meaning 'this' is rendered by the strange form *ha-ri-be* ('here it is?'). It seems that *ya-r-si* 'this' in [Cerulli 1938: 127] shares the same root with these forms.
